58 NEW WATER WELLS OFFICIALLY PUT INTO SERVICE:

Our 60 well agreement with the Southern Region Water Bureau has been completed and 58 wells were “officially” put into service. Two of the wells were not completed because the rain prevented our crew from taking the rigs into those areas. Our next 20 well agreement will be signed very soon, and those two wells will be added to that agreement. Thousands of people now have access to pure clean water in three different areas in the Sidami Region. These wells were in the most difficult drilling areas we have ever drilled in. There were very few roads to the well sites. In many places there were not even trails to the sites. The people had to cut access roads, remove trees and put stones in creeks beds and make log bridges for our rig and support vehicles. It was a beautiful rugged mountainous country but very difficult country to drill water wells there. God blessed the hard work of our crew and with the prayers and financial support from all of you the job was completed. Give God the glory!!!

The people at every new well are overwhelmed with thanksgiving. No more do they have to drink contaminated pond water or stream water. They do not have to depend on small springs that dry up when the rain stops. The girls and young ladies that must search for water are now able to go to school. Everyone is thankful to God, and their hearts are open to study His word with our evangelists.

One bible training school has been completed for 10 of the men who have obeyed the gospel and the second one is now being planed. House churches have been established, and others are being planted. The gospel is powerful and through providing pure clean water, the light and love of Jesus is expressed. God is using all of you who pray for and contribute to this ministry. Thank you!!

On the left a well is being drilled. You can see the tree that has been trimmed to allow the rig to get to the drilling site. Cutting down trees and natural fences are the only way the sites can be reached. At the end of a drilling agreement, Monte Hininger travels to Ethiopia and helps the crew make repairs and needed changes on the rigs. Constant maintenance is critical. He is an excellent trainer and provides on-site oversight as members of the crew do the work. Currently our 20-ton Isuzu support truck that carries the drill stem and the air compressor is out of service. OEM parts for it were finally located in Kenya and Qatar and will soon arrive to enable the clutch assembly to be rebuilt. God provides!!!

UPDATE ON THE RETA CLARK MEMORIAL MEDICAL CLINIC MINISTRY

Medical Ministries International (MMI) located in Fresno, California, is putting together the medical supplies and equipment being donated for our clinic in Addis Ababa and it is all being loaded into a 40-foot shipping container. The plans for this process started prior to Covid 19 and it seems the obstacles have been overcome to proceed. Included with this shipment will be a new digital X-ray machine with all the attachments. It has been ordered and will be shipped to MMI from the manufacturer in Houston, Texas. MMI's goal is to have the container on its way by the end of the year. Habtu will work diligently to help obtain the container into Ethiopia without paying customs. Pray for his success!

These additions, especially the X-ray machine, will elevate the clinic to a new level with the Public Health Department. The poor people living in the Mekanissa area where our compound is located are blessed every day having access to medical treatment in our clinic. Many of you have contributed to helping with the costs of shipping the container and to purchasing the X-ray equipment. Contributions are still being received. God bless all of you for your support! Updates will follow in the December newsletter. (Galatians 6:9)

Receiving care in our clinic is much the same as receiving care here in America. They are busy all

day and sometimes into the night!! Once again, thanks to all of you who with God's help make all the ministries in Ethiopia possible. (Jim Wilson will provide a report on the National Preachers Conference and the Addis Ababa Bible Training institute in his insert included with this mailing. It was a great occasion!

Kevin and John Ed Clark
